CARE INSTRUCTIONS

CANVAS CARE

We recommend that your new Nebula is thoroughly wet down before first use. This will ensure that your Nebula performs well in wet weather by allowing the poly/cotton cospun thread and canvas to swell, ensuring the take up of any potential leaks in the stitching.

CLEANING

Clean with cold fresh clean water and a soft brush.

WARNING: DO NOT USE SOAPS OR DETERGENTS ON THE CANVAS. DO NOT EXPOSE TO PETROLS, OILS OR HARSH CHEMICALS.

STORING

Correct storage is vital. If the Nebula was dismantled when wet, then it and the mattress must be dried as soon as possible.

INCORRECT STORAGE IS NOT COVERED BY THE WARRANTY.

MOISTURE/CONDENSATION

Condensation is a natural occurrence in confined areas like swags/tents due to the body releasing more moisture than the canvas can dispose in cold weather. To minimise the chance of condensation, we recommend slightly opening the window to enable airflow on cold nights.
